

CREATION COMIC SERIES

DINOSAURS & DRAGONS

The truth behind
the legends

I enjoyed watching the movie *Jurassic Park*. Imagine if it were real, with **dinosaurs and people living together!**

The idea of man and dinosaurs being **alive together** is not at all far-fetched!

According to the Bible, **dinosaurs and man have lived together!**

Yes, **that's what is usually taught.** However, the Bible says that the world was created by God about 6,000 years ago. People and land animals (which includes the dinosaurs) were both created on Day 6, so they would have lived together. We need to consider which view of history has the facts more on its side—**creation or evolution?**

How is that possible? Most schools and universities teach that the world is billions of years old, and that dinosaurs became extinct millions of years before man evolved from ape-like ancestors.

Well, if dinosaurs were once alive at the same time as people, we'd **expect to find some evidence of that in history.**

Absolutely right! And there's plenty of evidence to suggest people have **seen living dinosaurs.**

Huh? How come we **don't hear** about this?

Because most people who accept evolution as a fact don't believe that it's possible for man and dinosaurs to have lived at the same time. They try to explain away the evidence because it doesn't fit with their ideas.

What about **fossils of dinosaurs?** Don't they prove they are millions of years old?

Not at all. In fact, they are **good evidence that the Bible is true!**

Coelophysis bauri

This particular specimen (left) was found at Ghost Ranch, USA, in 1947, where many fossil skeletons were found together. Its fossilized remains still contain evidence of its last meal. Because of the abundance of this species it is the most studied of all dinosaurs found in North America.
